TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, C

Web Technologies: HTML5, CSS3, JavaScript, React.js, Responsive Web Design, Bootstrap

Backend & APIs: Node.js, Express.js, Flask, REST APIs

Database: MongoDB, MongoDB Atlas, SQL, DBMS

Core CS Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Software Engineering, Computer Networks, Operating Systems

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Groq API

PROJECTS

Responsive Restaurant Website

September 2024

Tech Stack: HTML5, CSS3, JavaScript

- Engineered a fully responsive restaurant website spanning 5 pages (home, menu, booking, about, contact) with an interactive menu and table-booking interface, tested across 3 screen breakpoints (desktop, tablet, mobile).
- Applied responsive web design principles (CSS Flexbox/Grid, media queries) to deliver consistent layouts and eliminate layout-shift issues across devices.
- Implemented JavaScript-driven interactions, including category-based menu filtering and real-time booking form validation, to improve user engagement and streamline the browsing experience.

AI Study Buddy

April 2026

Tech Stack: Python, Flask, JavaScript, HTML/CSS, Groq API

- Architected a full-stack AI study assistant using Python, Flask, JavaScript, HTML/CSS, and the Groq API, delivering real-time AI responses to personalized study queries.
- Built multi-chat functionality supporting unlimited concurrent conversations with automatic chat naming, local history persistence, and instant English/Hindi language switching.
- Enabled document upload support (PDF parsing) and microphone-based voice input, reducing manual typing and improving accessibility within a responsive chatbot UI.

Sustainable Fertilizer Optimizer for Higher Yield

May 2026

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB Atlas

- Built a data-driven MERN-stack web application analysing soil NPK levels, pH, and crop type to generate tailored fertilizer recommendations for farmers.
- Designed rule-based recommendation logic covering 4 crop types to suggest fertilizer type, quantity, and application timing based on soil nutrient deficiencies.
- Integrated MongoDB Atlas for persistent application data storage and a live weather forecasting API to deliver weather-aware, soil-based recommendations in real time.

ACHIEVEMENTS

- Ranked in the Top 30 out of 200+ participants in the University Code Quiz organized by club Optimyzr for Success, involving DSA and logic-building rounds — September 2024
- Selected participant in Career Connect, a professional networking and case-study competition organized by Magnitude Club — October 2024

CERTIFICATIONS

- React.js — 15+ hour MOOC | *Tech Veda* March 2025
- Programming in C++ | *Infosys Springboard* May 2025
- Programming in Java | *iamNeo* May 2026

EDUCATION

Lovely Professional University

Bachelor of Technology — Computer Science and Engineering | CGPA: 8.2 / 10

Phagwara, Punjab
August 2024 - present

Kamla Nehru Public School

Intermediate (PCM — Physics, Chemistry, Mathematics) | Percentage: 72%

Chak Hakim, Phagwara
April 2022 – March 2024

Akal Academy Chak Mander

Matriculation | Percentage: 94.8%

Chak Mander, Banga
April 2021 – March 2022
